Abstract [English]

"for many years corporate governance research has mainly focused on changes in the 'insider systems' of corporate governance in continental europe. due to the dramatic company scandals in the us and the increasing demands for a sustainable economy, however, this focus has shifted: tendencies toward change in the anglo-saxon 'outsider systems' have become points of greater concern. along with this, the 'principal agent theory' as the dominant theory of corporate governance is increasingly being challenged. new theoretical models are called for, which could better explain the complex reality of changing corporate governance systems. in the anglo-saxon countries, a critical scrutiny of the assumptions of principal agent theory has reinforced new alternative approaches and studies which, unlike the classical research, draw on wider perspectives of corporate governance and raise fundamentally different questions concerning the design of the system. the results of this research have not been very broadly circulated and discussed in germany up to now, but they could bring some new insights into the current discourse surrounding co-determination reforms and improvements in supervisory board work. the purpose of this report is to present these new approaches and studies, contrast them to principle agency theory, and in so

Abstract [Deutsch]

"die corporate-governance-forschung hat sich lange zeit vor allem auf die veränderungen in den kontinentaleuropäischen 'insidersystemen' konzentriert. nach den dramatischen unternehmensskandalen in den usa und im zuge der steigenden anforderungen an ein 'nachhaltiges wirtschaften' werden in den letzten jahren jedoch auch die veränderungen in den angelsächsischen 'outsidersystemen' stärker thematisiert. damit wird die prinzipal-agenten-theorie als die bislang dominierende theorie der corporate governance einer
